

## Lunch seminar

**Tuesday June 21<sup>st</sup> 2022, 12.30-13.10**

***Department of Biology and Biotechnology "L. Spallanzani"***  
***Università degli Studi di Pavia***

***Aula Buzzati-Traverso***

**"Protein engineering and novel synthetic applications of  
oxidoreductases and transaminases"**

**Prof. Francesco Mutti**

Van't Hoff Institute for Molecular Sciences  
University of Amsterdam (NL)

Francesco Mutti is associate professor of biocatalysis at the University of Amsterdam. He is the group leader of HIMS-Biocat ([www.hims-biocat.eu/](http://www.hims-biocat.eu/)), a high multidisciplinary team of enthusiastic researchers working at the interface between biological and chemical sciences. The major aims of HIMS-Biocat are to develop new biocatalysts and biocatalytic systems for the sustainable and efficient synthesis of organic molecules that are relevant for the chemical industry as well as to address fundamental questions of biological chemistry.

Francesco Mutti CV at <http://www.hims-biocat.eu/francesco-mutti/>

*Hosts: A. Mattevi, D. Ubiali, C. Binda*
